

## [ FAR FORWARD MEDICAL CAPABILITIES FOR UN MISSIONS IN SOMALIA ]

Iqarus rapidly deployed an Aeromedical Evacuation Team (AMET) to provide critical evacuation services for the United Nations, supporting military and operational needs in Somalia. We deliver 24/7/365 far forward medical care for UNSOS, ATMIS, SNF, and other entitled personnel, both in Mogadishu and at outlying duty stations.

### Operational Excellence

Since 2012, Iqarus has embedded itself in Somalia's complex and volatile environment, consistently delivering medical support despite the challenging political and security landscape. Our ability to adapt and maintain mission readiness ensures that military personnel receive the care they need when it matters most.

### Key Achievements

#### Effective Far Forward AMET Capability:

- Providing life-saving care directly from the front lines.
- Enhancing the mission's medical support system by building capacity and capability.
- Boosting the morale and confidence of deployed military personnel.

#### Training and Mentoring:

- Deploying four AMET staff as Pre-Hospital Trauma Life Support (PHTLS) and Advanced Life Support (ALS) instructors.
- Delivering primary and refresher training, including Tactical Combat Casualty Care (TCCC), First Responder Course, Basic (Cardiac) Life Support, ACLS, PHTLS, and BSAFE training.

#### Integration into the Mission's Mass Casualty Plan:

- Seamlessly integrating into the UNSOS Mass Casualty Contingency Plan, effectively managing surges in patient loads during mass casualty incidents.

#### Rapid Deployment Success:

- Achieving Full Operating Capability (FOC) in Mogadishu and all AMET Sub-Team locations within 30 days of contract signature.

#### Unmatched Operational Capabilities:

- Delivered high-quality care despite high patient turnover.
- Maintaining 24-hour operational capability, including night evacuations using night vision goggles.
- Conducted evacuation missions in highly kinetic warfighting zones.
- Providing continuous support during periods of military transition and high patient volumes.
- Demonstrating effective command and control in rapidly changing political and security environments.

#### Collaborating seamlessly with multinational military forces

Iqarus' commitment to delivering far forward AMET services efficiently and effectively has not only met the UN Mission's requirements but has also set new standards for aeromedical evacuation capabilities. Our presence and adaptability in Somalia highlight our dedication to providing mission-critical support, directly impacting the lives of those on the front lines in the world's most challenging environments.
