

TURNKEY DEPLOYABLE FACILITIES

Iqarus provides turnkey deployable facilities with a well-established track record in planning, designing, constructing, staffing, and operating medical treatment centres, encompassing everything from small clinics to more expansive definitive care hospitals. Our meticulously crafted designs centre around enhancing the patient care journey. Complemented by our diverse, international, and local multidisciplinary medical and support teams, we offer comprehensive end-to-end solutions for health, safety, occupational hygiene, and environmental risk management. Our offerings span a wide spectrum, including paramedic facilities, Role 1, Role 2F, Role 2B, and Role 2E fixed, movable, and mobile turnkey facilities.

Our expertise includes transferring knowledge to permanent and local staff through Iqarus' medical training and development programmes, ensuring best practice clinical and operating procedures through ongoing quality control, oversight, and medical governance. We also specialise in planning, designing, and building technology-enabled facilities uniquely positioned to suit the cultural and healthcare needs of local populations.

We specialise in full-scale laboratory, radiological, diagnostic, and surgical capabilities. Our biomedical preventative maintenance programmes ensure that our facilities are always in optimal condition. Additionally, our facilities are equipped with the latest medical equipment and consumables, and our financial management and insurance billing services provide clients with a complete end-to-end solution.

Iqarus delivers exceptional medical facilities that meet the highest international standards, supported by efficient international and regional supply chains. Our turnkey deployable facilities offer an all-inclusive solution to meet the demands of any healthcare environment.
